TOUR / OBILAZAK

Tour of the center was constructed as a self-guided experience where you as the user control the content. In our tablets you will find an abundance of information and videos about helicopters, pilots and missions in which they took part.

Obilazak centra je koncipiran kao samovođena tura uz pomoć modernih tableta, preko kojih sami kontrolirate sadržaj koji Vas zanima. Uz audiovodiča, na tabletima će te naći obilje zanimljivih videa vezanih uz helikoptere, trening pilota i misije u kojima su sudjelovali.

FLIGHT IN SIMULATOR / LET U SIMULATORU

When your tour is finished our staff takes you to the briefing room where the instructor gives you an introduction and important information before flight. During the flight you will go through the mechanics of take off, flight and landing. Flights are available for children (6+) and adults.

Nakon završenog obilaska, naše osoblje Vas otpрати u sobu za brifing gdje sa instruktorom prolazite uvod i važne informacije prije leta. Tijekom trajanja leta prolazite polijetanje, prelet i slijetanje. Letovi su doostupni za djecu (+6) i odrasle.
